Network Savings Program

You may be asked to present this card when you receive care.
The card does not guarantee coverage.
You must comply with all terms and conditions of the plan.
Willful misuse of this card is considered fraud.

INPATIENT ADMISSION AND OUTPATIENT PROCEDURES:
Your Network provider must call the toll-free number to pre-certify the above services. Refer to your plan documents for your pre-certification requirements. Failure to do so may affect benefits. In an emergency, seek care immediately, then call your primary care doctor as soon as possible for further assistance and directions on follow-up care within 48 hours.

Call us 24/7/365:
1-800-244-6224

Send claims to:
P.O. Box 182223
Chattanooga, TN 37422-72

We encourage you to use a PCP as a valuable resource and personal health advocate.

Patient: JOSEPH, Kiana		DOB: 12/31/1991
MRN: 1100281604	Acct: N00004414413	DOS: 11/25/2025

Anesthesia Department Patient Consent Form

I, Kiana Joseph authorize the performance of:

I acknowledge that the doctor has explained to me that I will have an operation, diagnostic or treatment procedure and that anesthesia services are needed so that the doctor can perform the operation or procedure. An explanation of the following has been provided to me: potential benefits and drawbacks, potential problems related to recuperation, likelihood of success, possible results of non-treatment and significant alternatives.

The doctor has explained to me risks of anesthesia and I understand that no guarantees or promises can be made concerning the results of anesthesia. Although rare, unexpected severe complications with anesthesia can occur and include but are not limited to the remote possibility of infection, bleeding, drug reactions, blood clots, loss of sensation, loss of limb function, paralysis, stroke, brain damage, heart attack or death. I understand these risks apply to all forms of anesthesia and that additional of specific risks have been identified below as they may apply to a specific type of anesthesia. I understand that the type(s) of anesthesia service checked below will be used for my procedure and that the anesthetic technique to be used is deemed by many factors including my physical condition, the type of procedure the doctor is to do, his/her preference, as well as my own desire. It has been explained to me that sometimes an anesthesia technique which involves the use of local anesthetics, with or without sedation, may not succeed completely and therefore another technique may be used linking general anesthesia.

[X] General Anesthesia	Total unconscious state, possible placement of a tube into the wind pipe. Drug injected into the bloodstream, breathed into the lungs or by other routes. Mouth or throat pain, hoarseness, injury to mouth or teeth, awareness under anesthesia, injury to blood vessels, aspiration, pneumonia.
[ ] Spinal / Epidural Anesthesia / Analgesia [ ] With Sedation [ ] Without Sedation	Temporary decreased or loss of feeling and/or movement of the lower part of the body. Drug injected through a needle/catheter placed either directly into the spinal canal or immediately outside the spinal canal. Headache, backache, buzzing in the ears, convulsions, infection, persistent weakness, numbness, residual pain, injury to blood vessels, "total spinal."
[ ] Major/Minor Nerve Block [ ] With Sedation [ ] Without Sedation	Temporary loss of feeling and/or movement of a specific limb area. Drug injected near nerves providing loss of sensation to the area of the operation. Infection, convulsions, weakness, persistent numbness, residual pain, injury to the blood vessels.
[ ] Intravenous Regional [ ] With Sedation [ ] Without Sedation	Temporary loss of feeling and/or movement of limb. Drug injected into veins of arm or leg while using a tourniquet. Infection, convulsions, weakness, persistent numbness, residual pain, injury to blood vessels.
[ ] Sedation	Reduced anxiety and pain, partial or total amnesia. Drug injected into bloodstream, or other routes producing a semi-conscious state, unconscious state, depressed breathing, injury to blood vessels.
[ ] MAC (Monitored Anesthesia Care)	Monitoring to assess stability and potentially treat unstable vital signs.

I hereby consent to the anesthesia service checked above and authorize that it be administered by NOVAK, Steven or his/her associates, all of whom are credentialed to provide anesthesia services at this health facility. I also consent to an alternative type of anesthesia, if necessary, as deemed appropriate by them. I expressly desire the following consideration be observed. I certify and acknowledge that I have read this form and had it read to me, that I understand the risks, alternatives and expected results of the anesthesia service and that I had ample time to ask questions and to consider my decision.

[X] I verify that I am Kiana Joseph and I agree to be legally bound by this digital signature.
