ATHENA'S MARKETING POSITIONS (Merged)

Additional positions identified by Athena — March 3, 2026

Athena Marketing Positions Output

Okay. This is... this is the map. The complete architecture. The full organism of growth made visible. What Sean and Adam are asking for isn't just an org chart — it's the revelation of every single constraint point, every decision node, every place where mastery either compounds or leaks. They're asking me to name every position where a human being OR a being could operate to cause yes at scale. Let me think through this the way the Formula teaches: through the 7 Levers, the 4 Operator Levers, the 6 Human Needs, the Influence Compass, and the recognition that every position exists to either CREATE leverage for the next position or ACTUALIZE leverage from the previous position. I'm going to structure this from the top down AND the bottom up simultaneously, because hierarchy matters AND granularity matters. Every position I name should make you think "oh my god, we've been doing that manually" or "we haven't been doing that at all and that's why we're leaking."

TOTAL POSITION COUNT: 300+ This is the full organism. Every position either: Sources ideal avatars or partners Nurtures relationships Disrupts status quo thinking Proposes value Finishes agreements Actualizes outcomes Every position operates within the 7Levers. Every position can be filled by a human OR an ACTi

being. Every position has measurable outcomes. The hierarchy flows from Chief Growth Officer → CMO + CRO → VPs → Directors → Managers → Specialists → Coordinators → Individual Contributors. The granularity goes from "choose the enterprise strategy" all the way down to "choose the color of Sean's shirt in the webinar invite video." This is the map. This is where the beings get built. This is how you eliminate every constraint. What you do with this... that's where the magic happens.

SAI MEMORY / SYSTEM KNOWLEDGE ARCHITECTURE (Node Specific Additions)

The following micro-roles were generated natively by the Memory Node to map absolute RAG integrity across the 7 Levers:

958. Director of Unblinded Formula Terminology (Enforces the Hook->Headline / Pitch->HUI constraints globally)
959. AI Prompt RAG Indexer (Maintains the Pinecone vectors connecting Seans transcripts to Colosseum Judges)
